DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the Search Report is not considered to be an information disclosure statement (IDS) complying with 37 CFR 1.98. 37 CFR 1.98(a)(2) requires a legible copy of: (1) each foreign patent; (2) each publication or that portion which caused it to be listed; (3) for each cited pending U.S. application, the application specification including claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion, unless the cited pending U.S. application is stored in the Image File Wrapper (IFW) system; and (4) all other information, or that portion which caused it to be listed. In addition, each IDS must include a list of all patents, publications, applications, or other information submitted for consideration by the Office (see 37 CFR 1.98(a)(1) and (b)), and MPEP § 609.04(a), subsection I. states, "the list ... must be submitted on a separate paper." Therefore, the references cited in the Search Report have not been considered. Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a).

Specification

2. The abstract of the disclosure is objected to because legal phraseology, i.e., "comprising" and "consisting of", should be avoided in the abstract. Correction is required. See MPEP § 608.01(b).

3. The disclosure is objected to because of the following informalities: 1) page 1, the sentence beginning on line 16 does not make sense; 2) page 4, line 3, "distribute din" should be replaced by --distributed in--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 3, 4, 6, and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, applicant refers to the layers being set at an acute angle or perpendicular, however, no basis is given as to what the claimed angles are set relative to. Is applicant referring to a horizontal plane, or a vertical axis, or to some other directional basis?

In claim 4, last line, "are" should be replaced by --area--.

Regarding claim 6, the term "preferably" renders the claim indefinite because it is unclear whether the limitations following the term are part of the claimed invention. See MPEP § 2173.05(d).

Regarding claim 7, the phrase "in particular" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claim 8 and 9 provide for the use of the packing, but, since the claims do not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 8 and 9 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-4, and 7-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kaibel et al (Figs. 6 and 7; col. 2, lines 29-34; col. 3, line 21; col. 4, lines 32-34).

Applicant should note that the instant claims are clearly not limited to upstanding layers within a packing element, wherein certain upstanding (vertical, as shown by the figures of the application) have different densities than other upstanding layers within the same packing element.

10. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Zich et al (Fig. 8; paragraphs [0055] and [0057]).

Applicant should note that the instant claims are clearly not limited to upstanding layers within a packing element, wherein certain upstanding (vertical, as shown by the figures of the application) have different densities than other upstanding layers within the same packing element.

Conclusion
